ABOUT US

- Established in 2019, "ABISL Group" is a leading Turnkey solution provider with ISO 9001:2015 certification. We offer high quality equipment solutions in more than 12+ Industries.
- Now, "ABISL Group" has a presence spanning over 22+ countries. We are associated with cGMP, FDA, CE certified manufacturing facilities in India, with proven stringent precision quality controls to meet the specific requirements of our global clients.
- Our Sales offices are located in Dubai U.A.E & India to offer world-class logistics support to our global clients.

OUR MISSION

We deal with the finest quality part manufacturers to ensure that our esteemed customers get nothing short of the best quality and practices. Our extensive stock of parts guarantees that we are able to provide more effective solutions for any client globally. Our passion and extensive knowledge and understanding of our field is surpassed only by our outstanding level of service, certified and respected throughout the region and beyond.

PACKING MACHINE

VERTICAL PACKING

When it comes to packaging, we lead the way with its high-speed, accurate ABISL PACKING. Designed especially for the ALL Industry, ABISL PACKING is a food packaging machine that offers quick and easy tool-less changeover of size parts resulting in minimum product falling height.

It packs a wide variety of snacks and similar food products in pouch formats such as the CSPP, Gusset with D-cut and Gusset. The perforation system makes it possible to produce chain of small pouches. SPRINT PACKING has HACCP & GMP compatible construction.

Vertical Packing Machine

HORIZONTAL PACKING

In case of Horizontal Form Fill Seal Machines, the machine operation is Intermittent. Plastic Laminated Film is drawn off a supply reel by a pair of rollers. The Reel passes over a folding plough which folds it into half.

Each Pouch gets separated from the web by a cutter and is transferred to the Rotary Turret. Each Pouch is held by a pair of Grippers while being passed from station to station which comprises of Pouch opening, Product Filling, Final Top Sealing & then Discharge onto the conveyor for product boxing and shipping processes.

The background of the image is a faded, light-colored photograph of industrial machinery. It features various components such as hydraulic cylinders, hoses, and metal fittings. A prominent white hydraulic valve block with a 'T-2' label is visible in the upper center. To the left, there are several black hydraulic hoses connected to a manifold. In the foreground, a large, polished metal shaft or cylinder is visible, with a blue O-ring or seal. The overall image has a soft, semi-transparent overlay effect.

THANK YOU

**PLEASE CONTACT ABISL FOR BEST QUALIFIED
EQUIPMENT SERVICES.**
