ABOUT US

- Established in 2019, "ABISL Group" is a leading Turnkey solution provider with ISO 9001:2015 certification. We offer high quality equipment solutions in more than 12+ Industries.
- Now, "ABISL Group" has a presence spanning over 22+ countries. We are associated with cGMP, FDA, CE certified manufacturing facilities in India, with proven stringent precision quality controls to meet the specific requirements of our global clients.
- Our Sales offices are located in Dubai U.A.E & India to offer world-class logistics support to our global clients.

OUR MISSION

We deal with the finest quality part manufacturers to ensure that our esteemed customers get nothing short of the best quality and practices. Our extensive stock of parts guarantees that we are able to provide more effective solutions for any client globally. Our passion and extensive knowledge and understanding of our field is surpassed only by our outstanding level of service, certified and respected throughout the region and beyond.

VACUUM TRANSFER SYSTEM

Dense Phase Pneumatic Conveying System is essentially a conveying process that transfers the material with high pressure at low velocity and high product-air ratio. It is suitable for conveying of materials that are friable, fragile, abrasive, or agglomerated in nature.

Our offerings cater to various industries and applications with installations across India and the overseas. We also offer Pulverized Coal Injection (PCI) systems for mini blast furnaces in compact designs.

Our solutions can be customized to suit the need of process and industrial applications.

Dense phase conveying system conveys bulk solids at long distances from single/multiple locations to single /multiple points preventing low material degradation. It transports abrasive materials with comparatively less wear and tear of the system and product as well. Compared to Mechanical conveying, long distance transportation is an added advantage in dense phase conveying.

The background of the image is a faded, light-colored photograph of industrial machinery. It features various metal components, including a large cylindrical part in the foreground, a complex assembly of pipes and valves in the upper left, and a control panel or sensor unit in the upper center with a circular label that reads "T-2". The overall tone is professional and technical.

THANK YOU

**PLEASE CONTACT ABISL FOR BEST QUALIFIED
EQUIPMENT SERVICES.**
